(54) Title: MOBILE COMMUNICATION METHOD AND DEVICE FOR PLAYING AN AUDIO FILE AT A REMOTE COMMUNICATION DEVICE

(57) Abstract: A method of configuring a mobile communication device for communication of audio files over a communications network via the download of program code, the method comprising storing the program code in a memory of the mobile communication device; obtaining an audio file; linking the audio file with an identifier associated with a remote receiving communication device; seeking to establish a connection with the remote receiving communication device using the identifier, and upon establishing a connection with the remote communication device, opening the audio file from the memory of the mobile communication device and playing the audio file to the remote communication device.
